

HOW TO PROJECT YOUR SCREEN/DEVICE (E.G., PHONE, COMPUTER)
TO THE TV MONITOR IN THE COMMONS - ROOM 3233 ETMSW

For Android phone and tablet users

How to project your screen to the TV

Note: Your phone must be running at least Android version 5.0

1. Connect to the wireless network "Commons-TV." No password is required.
2. Using the **TV remote control** and pointing toward the TV, press the "Input" button until "Screen Mirroring" is highlighted.
3. Press the circle button on the middle of the remote control.
4. On your phone or tablet, go to "Settings" -> "Screen Mirroring."

5. The phone will scan the network, and list of devices will be displayed.
6. Choose "Commons-TV."
7. The TV will configure itself and will start mirroring what is being displayed on your phone. Your projection size will be limited to the middle portion of the TV screen because of Portrait orientation. You can rotate the screen to Landscape orientation for full resolution.

Note that doing ANY of the following will disconnect your phone connection to the TV:

- Disconnect from the “Commons-TV” wireless network.
- Moving a couple of doors beyond the commons room.
- When receiving or making a phone call.
- The phone is idle long enough for the screen lock to be activated.

If you would like a paper copy of these directions, please go across the hall to Room 3335.
If you are unable to connect your device to the TV monitor, please go downstairs to the ETL
Lab, Room 2027 or call 312-996-0133 and ask for assistance.
